Campaign products

'Twas the night before Christmas, when all through the house
Not a creature was stirring, not even a mouse;
The stockings were hung by the chimney with screws
Never with Wera a need to use glues
As I drew in my head, and was turning around
Down the chimney St. Nicholas came with a bound.
A bundle of tools he had flung on his back
An Advent Tool Rebel, with a practical pack!

Again, this year, we will make the hearts of DIY enthusiasts' beat faster and accompany you in the Christmas season with what is probably the most iconic Advent calendar.

Four innovative Joker double open-ended wrenches with a small return angle of only 15° will be coming your way: now with a new super-useful clip. The perfect solution for mobile applications.

The bitholding screwdriver convinces with a bit magazine in the handle, which can be filled to your heart's desire. Fifteen stainless steel bits and a stainless steel bit holder ensure rust-free screw connections.

Another cracker: All tools in this calendar edition wear a colour-coordinated Christmas outfit and thus impress with their individualism. Are you still missing something? Well, hopefully! Naturally, one of the doors will hide your favourite bottle opener!

For very tight spaces

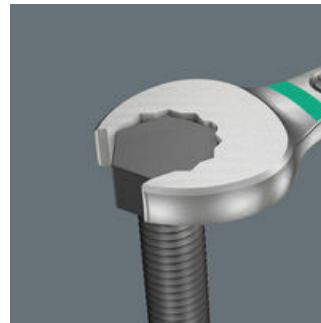

The Joker 6005 double open-ended wrench with its special mouth design - a 7.5° pivoted mouth and double hexagon geometry - doubles the placement points at a repeated 180° rotation of the wrench around the longitudinal axis. Bolts and screw heads can be engaged every 15°. The Joker 6005 will automatically find the respective placement point after every turn.

For pivoting angles under 30°

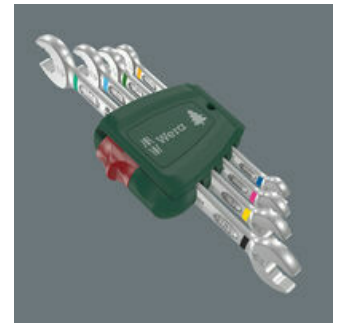

Thanks to the 7.5° pivoted mouths, the double hexagon geometry and an improved application method (placement - screwdriving - rotation - replacement - screwdriving - rotation etc), even screwdriving situations that have a pivoting angle of less than 30° can be solved.

Double-hex geometry

The double hexagonal geometry of the mouth of the Joker 6005 double open-ended wrench ensures the positive connection with the screw head or the bolt and reduces the risk of slipping.

Useful clip

Up to four Joker 6005 double open-ended wrenches can be stored in the clip. The wear-resistant material ensures that the double open-ended wrenches are held securely while at the same time being easy to remove.

Bit hand-holder with bit magazine

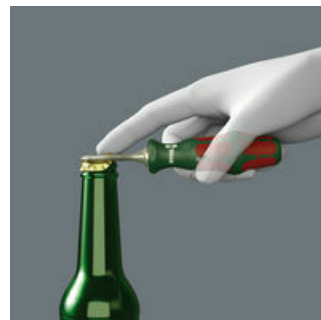

High-quality bit-holding screwdriver with a strong permanent magnet that holds bits securely. Multi-component Kraftform handle for comfortable, ergonomic work. Suitable for bits with 1/4" external hexagon drive as per DIN ISO 1173-C 6.3. Up to six bits can be stored in the magazine integrated in the handle.

Useful stand-up Bit-Check

Up to nine bits and a bit holder can be stored in the Bit-Check. The Bit-Checks can be placed at the workplace for easy access of the tools.

With bottle opener in the Wera design

With a bottle opener which you won't want to put down.

Rapidaptor stainless steel

Manufactured out of stainless steel thus preventing the formation of unsightly extraneous rust when working with stainless steel. Additionally, it offers all the advantages of the Rapidaptor technology.
